

BASAJAUN

The Forest to Building Digital Framework (F2BDF)

Digitalisation of the wood value chain

Towards Materials and Manufacturing Commons ◦ Berlin 4 April 2023
Andreas Rudenå ◦ Paramountric

This project has received funding from the European Union's Horizon 2020
research and innovation programme under grant agreement N° 862942

1. Tongue and groove profiles
2. Profiles substructure
3. Waterproofing

4. Biobased facade profiles
biobased polyester resin,
basalt fibers

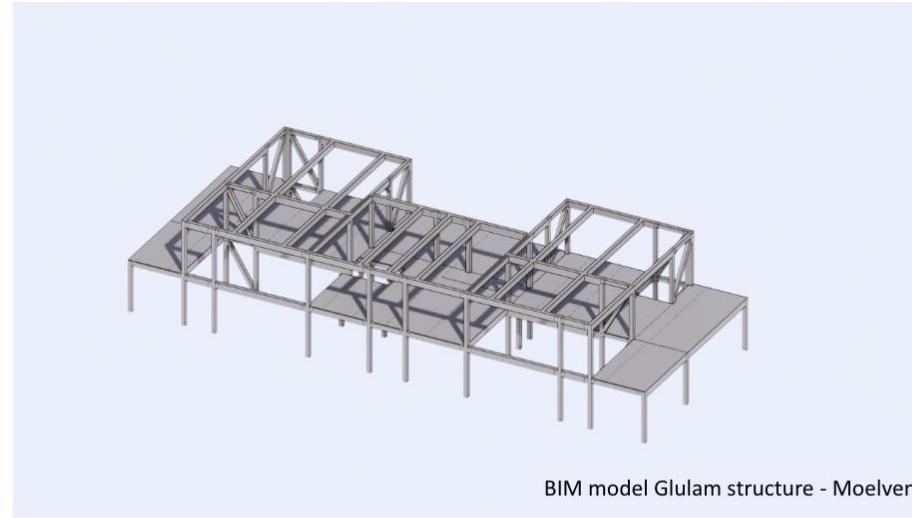

5. Biobased insulation
foam-formed wood fibre
insulation

6. Panel-to-panel connector
7. Plywood
8. Female mount on the beam
9. Male mount on the panel
10. Beam

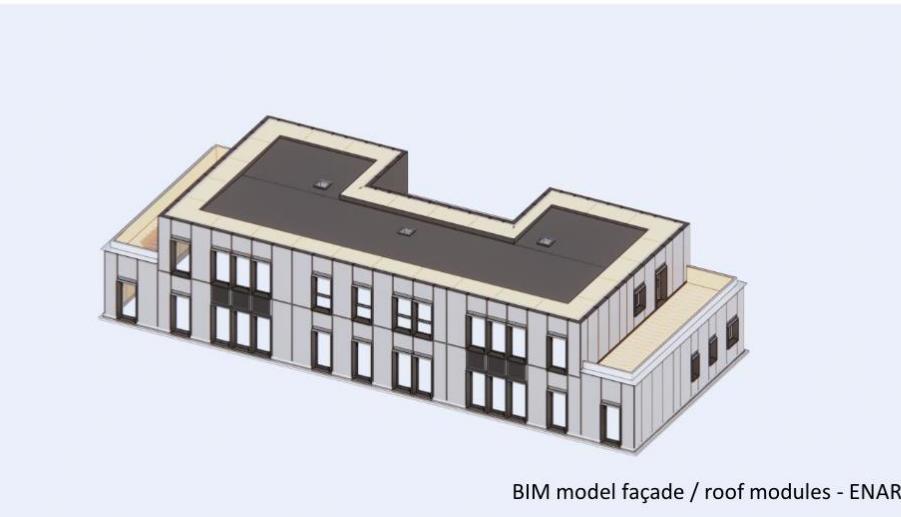

Main partners façade : Focchi, Omikron, ENAR

BIM model interior / foundation - UNStudio

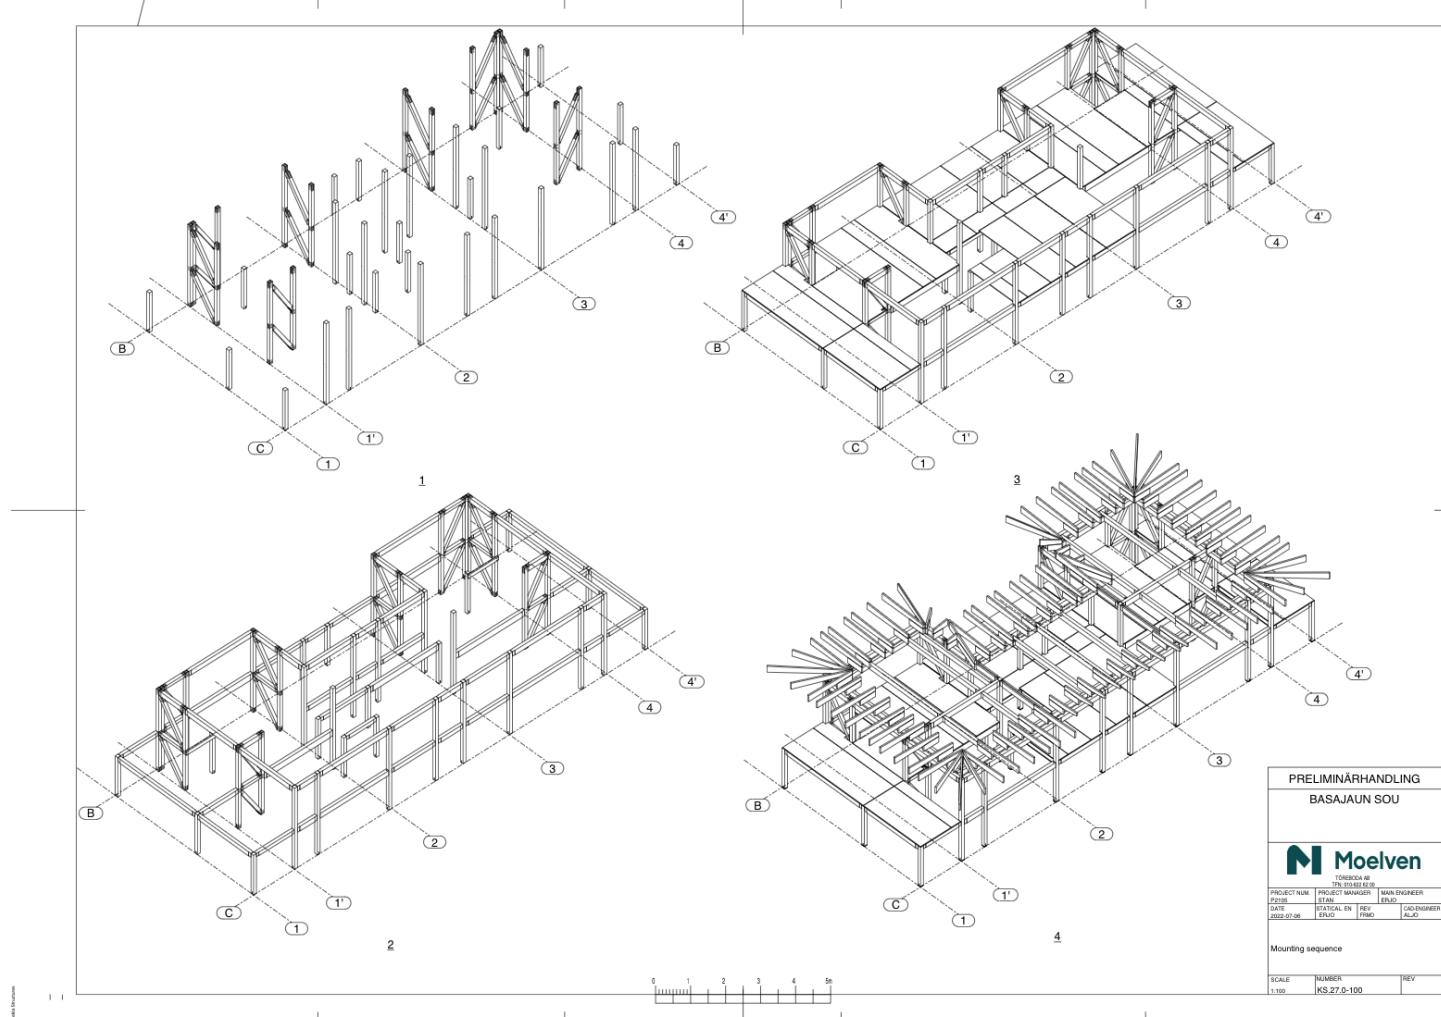

BIM model Glulam structure - Moelven

BIM model façade / roof modules - ENAR

BIM model façade / roof cladding - ENAR

F2BDF – is a tool for how to connect actors along the wood supply chain using collaborative a data flow

The figure displays two screenshots of the F2BDF Dashboard. The left screenshot shows a summary dashboard with metrics like Alerts (0), Notifications (0), Data Flow (0 msg/s), and Supply Chains (5). It also includes three line charts under the 'CHART' section and a 'STATISTICS' section at the bottom. The right screenshot shows a detailed supply chain graph with nodes representing locations and edges representing transport streams, color-coded by type.
