OntoCommons Workshop on Tools for Ontology Engineering
18. Mar. 2021

# Tools for Ontology Engineering

Tools for collaborative ontology design.

Bridging the gap between domain experts and ontology engineers.

# Tools for Ontology Engineering

- Tools for collaborative ontology design
- Problems:
  - Access Privileges: Should everything be accessible to everyone
  - Testing and Validation
  - Avoid conflicts
  - Scalability
- Support Collaboration Between Ontology Engineers and Domain Experts
- Guidelines for domain experts for development and documentation (Quick start)
- Bridging the gap between Industry and Academia
- Define different libraries/tools for focusing on a particular problem, which can further be combined to achieve one goal.
